Deloitte – Analyst USI Consulting

(On Campus Hiring 2022 Batch, Banasthali Vidyapith)

About the company

https://www2.deloitte.com/in/en/pages/about-deloitte/articles/about-deloitte.html

About job profile (Analyst)

An analyst gathers and interprets complex data to develop actionable steps that will improve processes and optimize results. They assess company and client needs, receive information and analyze it, looking for telltale trends or areas for improvement. The analyst then delivers that information to stakeholders and uses it to enhance the efficiency and effectiveness of a service, product, or system.

Note: This description wasn't provided by Deloitte. It's a general definition of the work of an analyst.

Brief of the procedure

- Interview
  Every role had different number of rounds. For Analyst, PI round only of 30 mins for each candidate with one-on-one interview.
- Declaration of Results: Same day as the interview
  Selected Students: 80 (approx.)

Preparation Steps and Tips

Step1- Role and Resume in parallel

Make your resume honestly and according to the skills required for that particular role. Mention only those projects and technical skills which you're confident about and have good grasp over. Try to relate your skills with that of an Analyst.

Step2- Aptitude Test Preparation

Practice aptitude from sites like IndiaBix (https://www.indiabix.com/), PrepInsta (https://prepinsta.com/learn-aptitude/) etc. Also take the Deloitte mock test to get familiar with the test environment. Main goal should be to increase speed with accuracy as time is a major obstacle here.

Step3- Interview Prep

Prepare for every topic mentioned on your resume. Look for most asked interview questions for all the tech skills your resume talks about and prepare from there. Prepare pointers for the HR round questions beforehand so you have a clear idea on what you'll say.

Step4- Technical Preparation

Since all the courses will be sitting for this, you should look up interview questions related to each skill for last minute preparation.

My Interview Experience

My interview was held on Zoom (link was already shared by their coordinator) and started off with my introduction. My interviewer asked me what subject I was comfortable in amongst the ones mentioned on my resume and asked me questions related to that. The interviewer gave me a few situational questions, asked about my future plans and how this role will help me achieve those. Then got asked about my projects – what work I did, what tools I used and how can I make the project better, followed by HR related questions. At the end of the interview I was asked if I had any questions for him.
